Using Pivot - Are you looking for deeper insight into your document set? Learn how Relativity lets you visualize your data, leverage your fields, and discover trends and patterns.

http://kcura.com/relativity/support/tutorials/using-pivot

Adding Redactions and Annotations - This tutorial explains markup sets in Relativity and shows you how to apply redactions and annotations to documents.

http://kcura.com/relativity/support/tutorials/adding-redactions-and-annotations

Coding and Tagging Documents - Are you ready to code your documents? In this tutorial, you'll learn how to work with layouts to code and tag your documents.

http://kcura.com/relativity/support/tutorials/coding-and-tagging-documents

Using Persistent Highlight Sets - This tutorial shows you how to use the Persistent Highlight Sets panel to manage a list of terms in a document.

http://kcura.com/relativity/support/tutorials/persistent-highlight-sets

Working with Relates Items – How does a particular document you're viewing in Relativity connect to other documents in your case? In this lesson, you will learn how to work with a document's related items.

http://kcura.com/relativity/support/tutorials/working-with-related-items

Working with Transcripts - In this tutorial, you will learn how to work with transcript documents.

http://kcura.com/relativity/support/tutorials/using-the-word-index

Performing Mass Operations - Are you looking to perform an action on a group of documents? This tutorial teaches you how to perform a mass operation.

http://kcura.com/relativity/support/tutorials/performing-mass-operations-6.4

Creating Searches - Do you know all the ways to search in Relativity? This searching tutorial outlines the differences between keyword search, dtSearch and saved search.

http://kcura.com/relativity/support/tutorials/creating-searches

Printing Case Documents - Do you need to print documents? This tutorial will show you how to print a single document or a group of images.

http://kcura.com/relativity/support/tutorials/printing

Assisted Review Web Site - This tutorial shows you how to make coding and review decisions using Assisted Review as an end user. You will also see a demo of Assisted Review during the tutorial.
